

LIVAMOB[®]

*Our Story
Begins with a Tree...*

In Pursuit of Perfection...

Liva-Mob brand which has commenced its journey in the year of 1984 and been serving for more than 30 years in furniture sector both inside and outside the borders of our country, owns a substantial amount of market share at retail, kitchen, bathroom, sliding door cabinets, interior door, floorboards and complete house and villa projects.

Liva-Mob which has managed to incorporate boutique production area with accomplished material manufacturers of the world, has significantly increased its competitive capacity in commercial projects and its market share via its furniture production facilities. Adding value to superstructure projects with incorporated foreign brands and with its production quality in compliance with European Standards, Liva-Mob appears on a separate platform with its after sales services.

We invite you to the world of Liva-Mob which is remarkable for its invariable quality and reliability and which adopted adapting itself to innovation by increasing its market share each passing day through a solid background, comprehension of human resources, debonair personnel and production quality policies.

Every Piece of Furniture Has a Story...

The story begins with a tiny sapling and goes on until it becomes a part of your living space. The sapling grows, flourishes and becomes a huge tree.

Within forests embracing trees, it continues its life for decades. When the time comes to depart from the forest, it commences its preparations to put itself up at your homes. To make your life easier and to offer you its best state... it's cut, hewed, carved and eventually appears before you wearing its most elegant of accessories. It is now ready to continue its life with you.

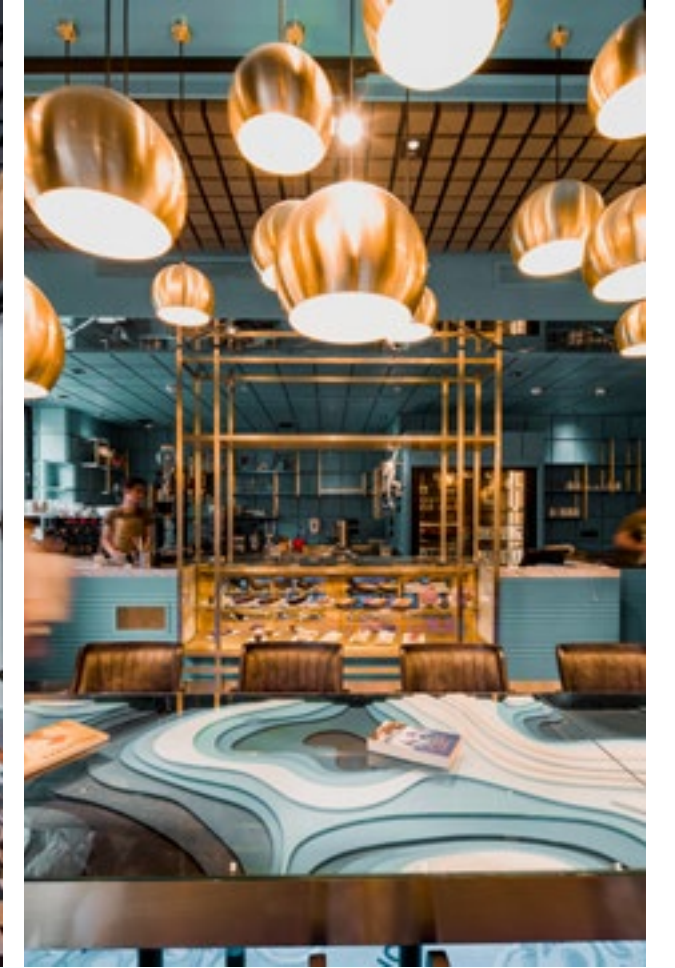

A visit with a touch of elegance at The Wings Hotel.

At the lobby, the most assertive element of the hotel, the design was brought into being by our team of experts through coding MDF lacquered boxes consisting of 12.000 pieces one by one and by processing each and every single piece over and over again.

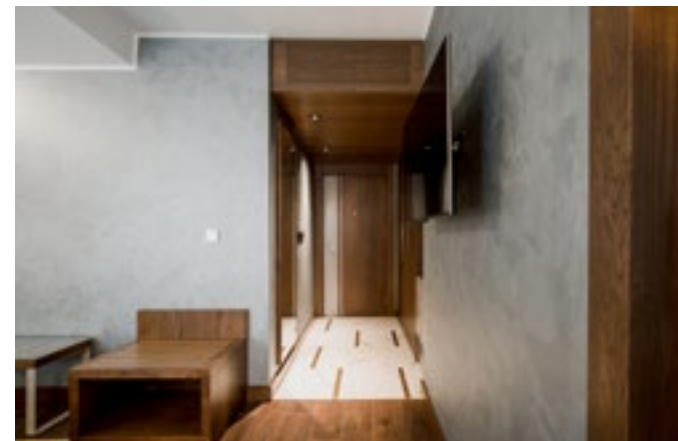

Designed by interior architect
Erdem Şeker, all details were enriched
by separating each hotel floor with
different colors.

Silhouette of Istanbul being used in bed headboards which is one of our most eye-catching applications, was depicted by talented young artists by means of oil paint technique.

The Wings Hotel

Every detail of the design in this extraordinary application created by the conflating of brass and wood with pastel colors, was given prominence.

This is our story...

*Our continued story of success
for more than 30 years...*

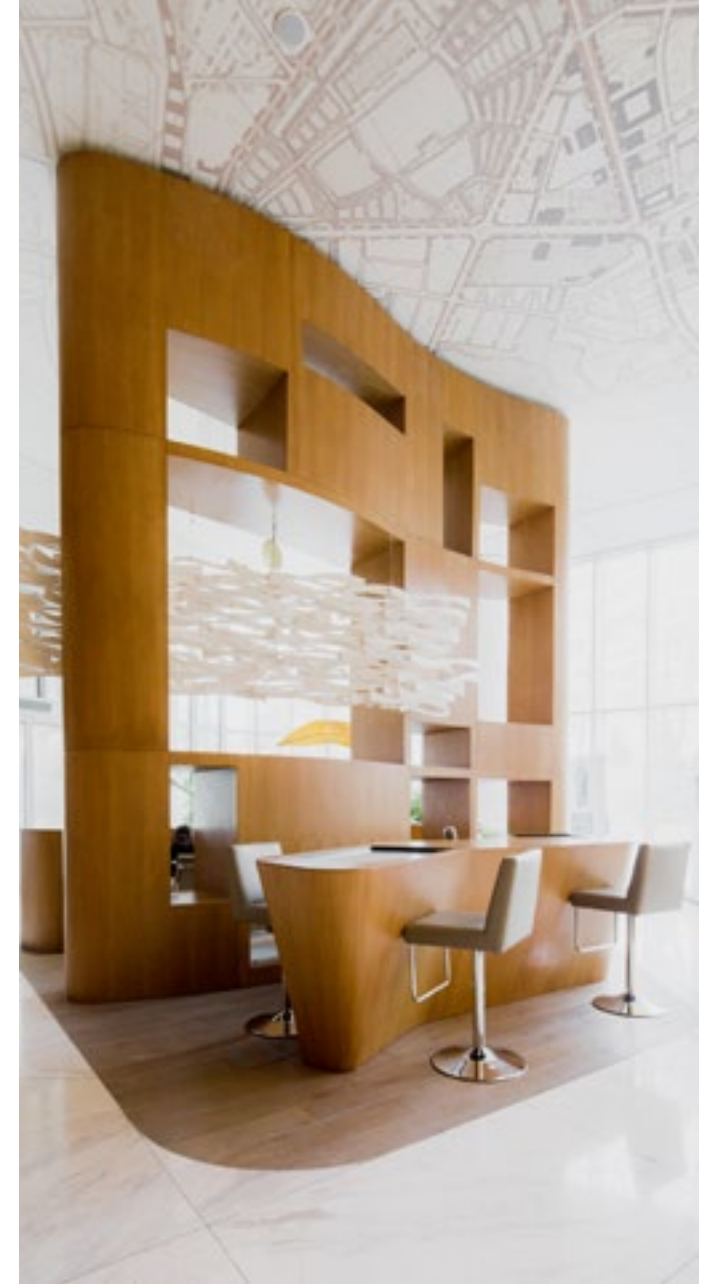

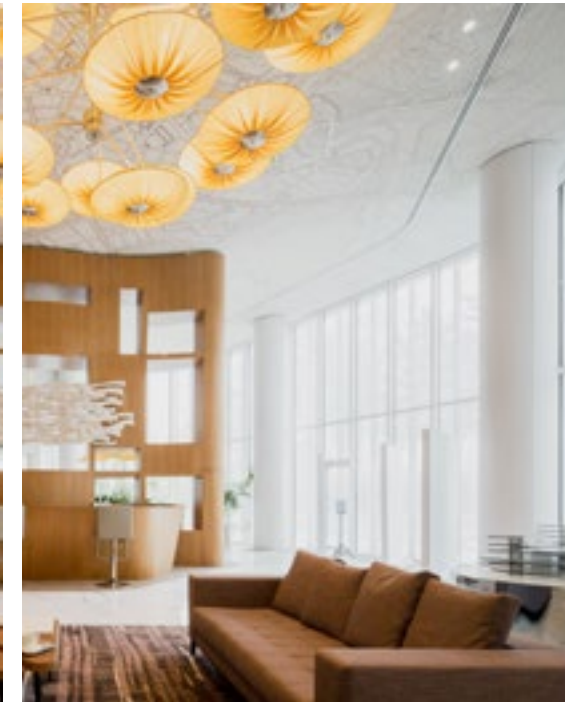

*We brought the warmth of
mother nature to your living
quarters with our everlasting
determination.*

We were full of life along with a burning passion of asserting ourselves in many more places and we embraced the world. While we were innovating with our urge to catch up with the new, you did too. While we gained value through our irrevocable quality, we also added value to our sector.

In this day and age, we continue going after flawlessness and perfection and we carry on with being a part of your lives.

*We added classiness
to Kuzu Effect
through our furnishings.*

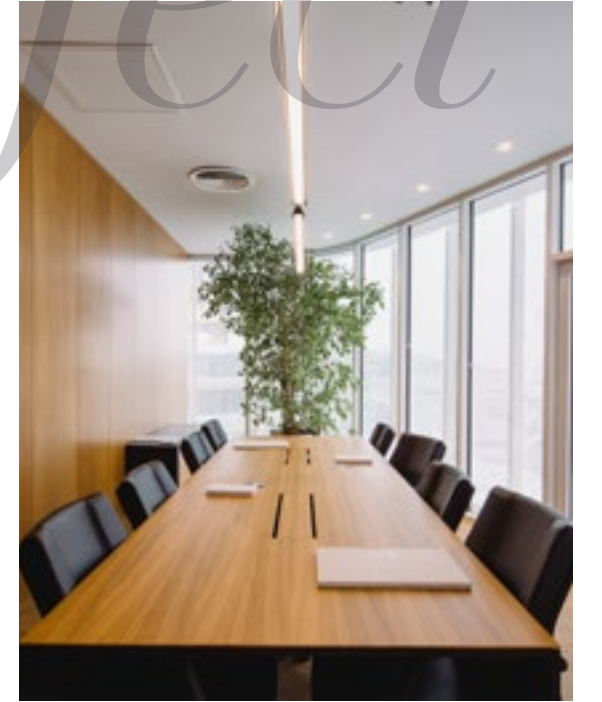

Designed by award-winning architect Emre Arolat who carried out many successful projects around the world, every detail of the project was enriched with natural polish over soft and oak.

Kuzu Effect

Project's difference was exhibited through details varying on every floor and every room.

Each and every single floor that we designed with caution and joy exhilarated not only us but also users.

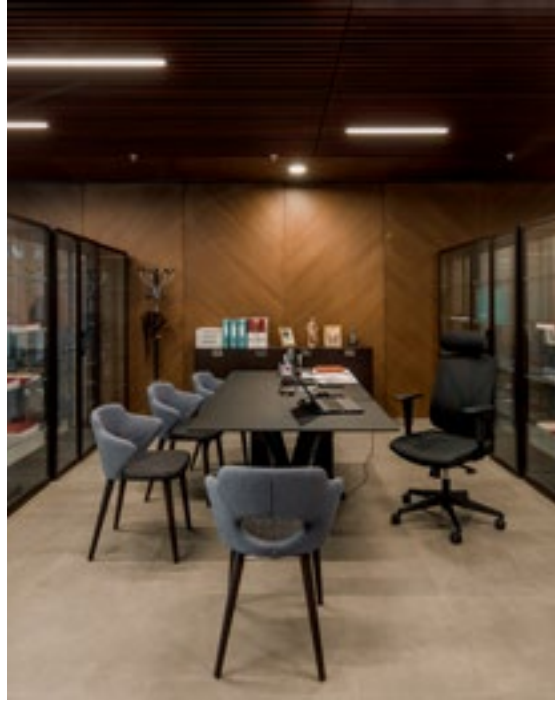

We Are Everywhere...

*In order to bring
joy to your living
quarters, wherever
you are,
we are there...*

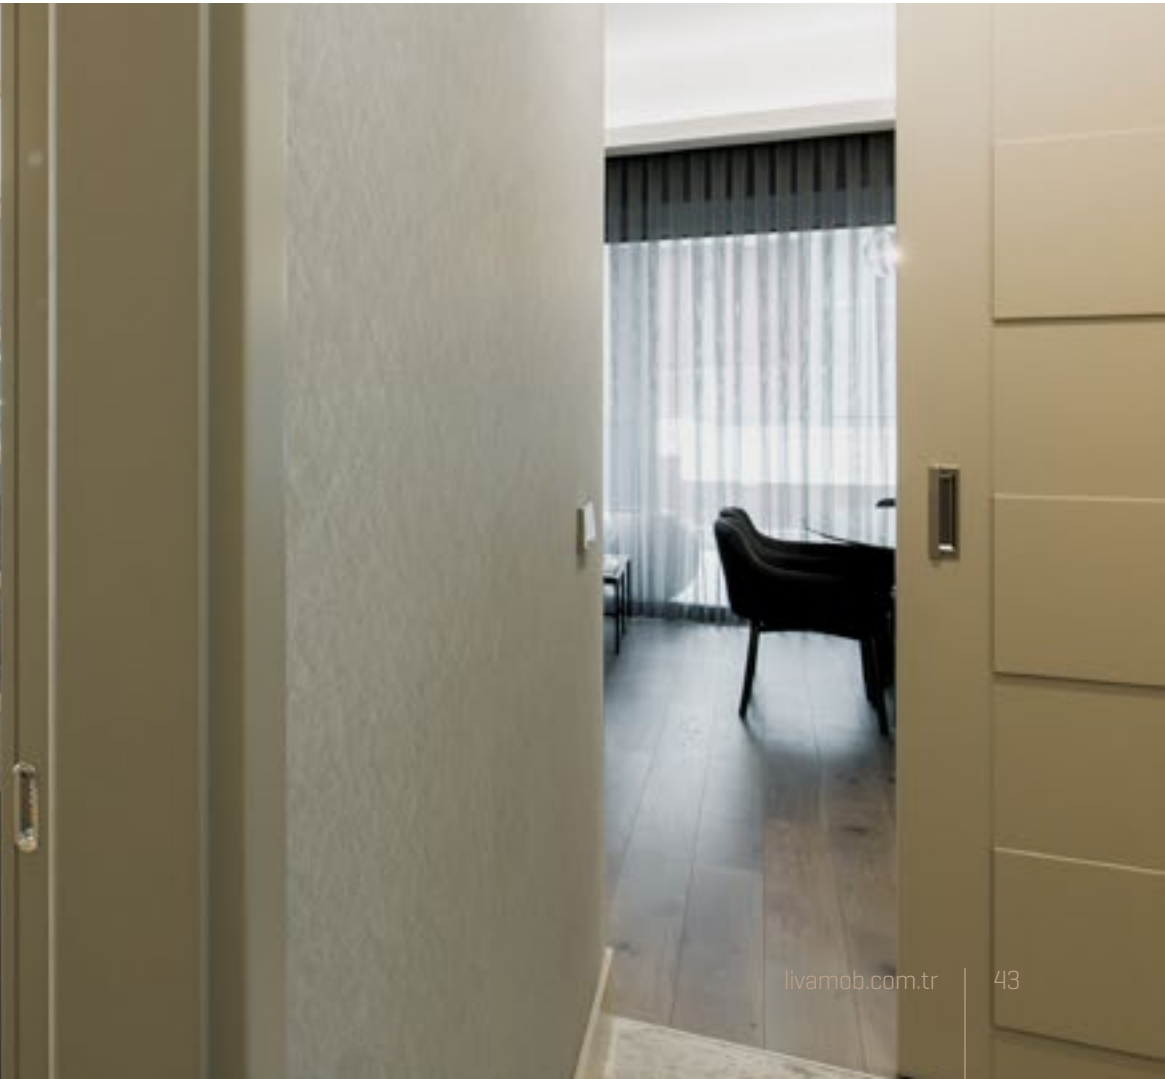

We are in your living rooms that bear witness to friendly conversations, on your desks where you achieve overwhelming success, in baby's rooms where you experience excitements, on your sofas that make you feel at peace, in your beds where you wake up together every day, on your tables where you share your happiness.

*Cepa Houses —
were perfected
through our quality.*

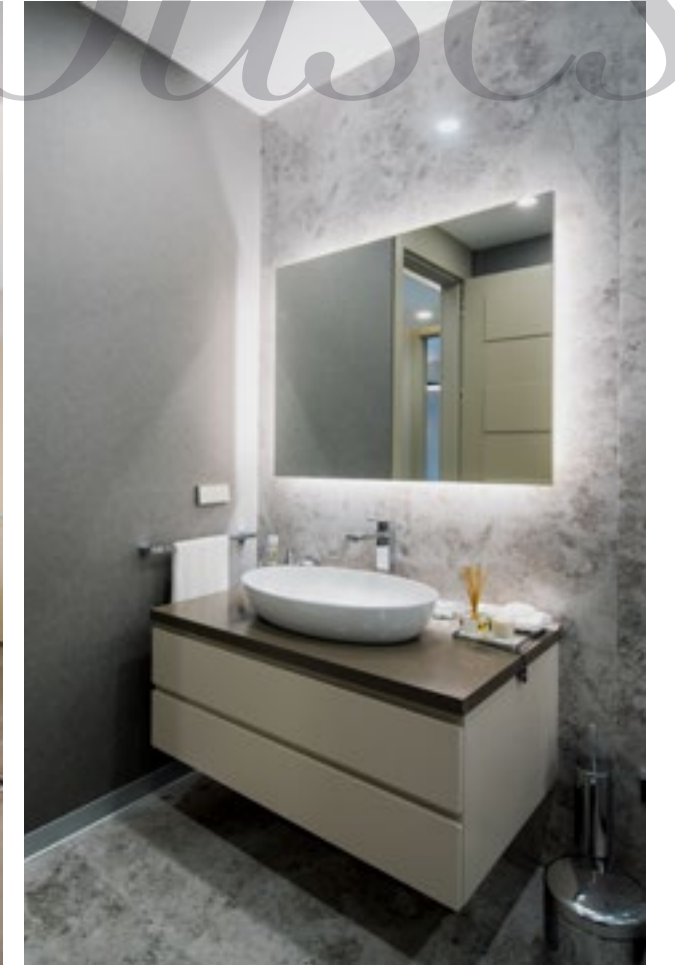

Materialized in a city area increased in value and designed by Ali Osman Öztürk, every single piece of furniture belonging to sales office and show flat of Cepa Houses was manufactured by our company.

Cepa Houses

Through lacquered doors and ready-to-use melamine materials used in the project that brings airiness to rooms with its high ceilings, users were offered comfort of use.

In the meticulously designed project, a different style was created where classical lines assume a modern and rich appearance.

Brilliant Collaboration of Art and Technique

Facilitating your lives with their functionality, while embellishing with their aesthetic value, our furniture reaches to your residences through the collaboration of skilled hands and designer minds. They submit creating a warm and cozy or peaceful living area to your choice. As Liva-Mob, we stand by your side in your kitchen, bathroom, sliding door cabinets, interior doors, floorboards and complete house projects.

*We created
the substructure
of aesthetics at Es-Peker.*

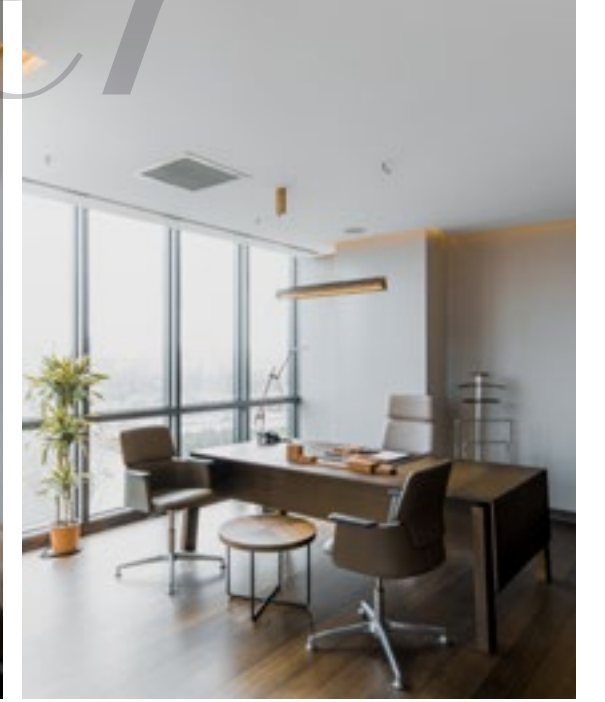

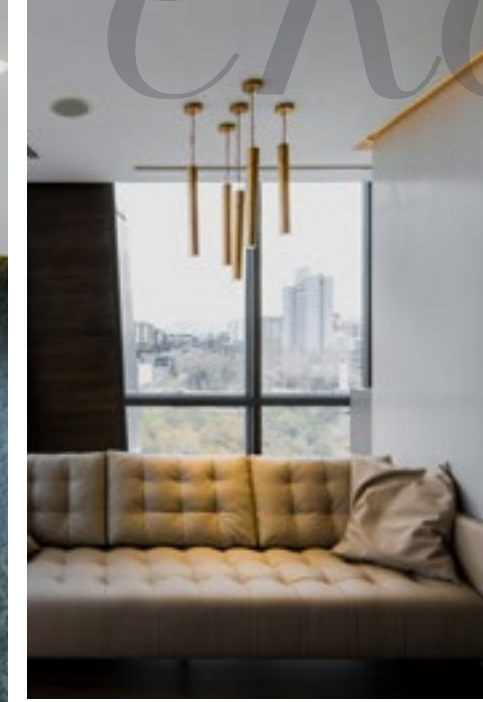

In our project designed by Rdms Architects in Milano, highest quality lacquered wall panels, smoked oak interior doors and natural marbles were used.

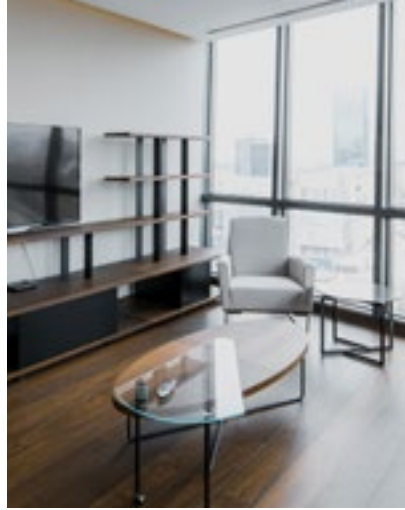

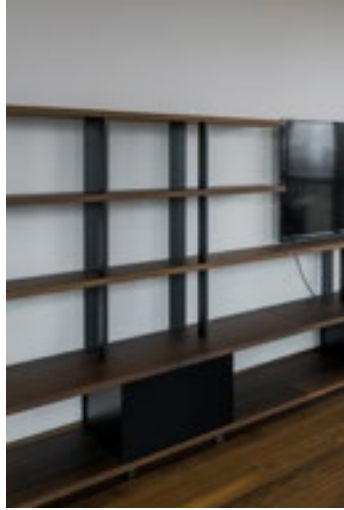

Es Paker

With vertical and live plants used for separating projects, we brought the energy of the nature into the location.

We added extra beauty to indoors by using henge07 lightings imported by our company.

Travelling Back In Time

*For centuries, furniture
has been used for
the same purpose:
Necessity and Decoration...*

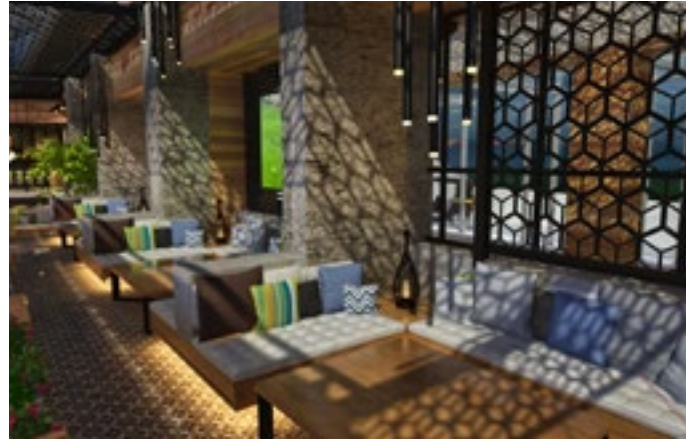

History of furniture goes back before common era. Humans crafted chairs by carving stones. Later on, humans began to craft tuffets, sofas and throne-like chairs. In time, humans became acquainted with art which brought engraving and use of gold into the forefront. Through the furniture crafted for sacred places in Europe, concept of furniture advanced substantially.

*We added zest to Huggabaz
with our eye-catching
furnishings.*

Through stationary and movable furniture used in the project designed by means of Tarkan Önal's experience, functionality and ease of use were emphasized.

Furniture materialized by our company was manufactured out of highest quality materials.

With oak panels, giant movable lacquered walls, colored ceilings out of CNC cut metal and stair railings, this place was designed without sacrificing quality.

Huqqaqabaz

Through Corian tables, wrought iron, corner sets made out of oak lining over contra and waterpipe stands, elegance was added to the place.

A Long and Joyous Road...

- The cost is calculated by making a list of required materials.
- Arriving materials are stacked in a manner that will facilitate its use and control.
- Depending on the model of the furniture, parts to be crafted are determined.
- Shapes of parts are drawn upon the wooden material.
- Parts are obtained through sawing, carving and engraving of wooden material.
- Parts are assembled in a suiting way to the project, smoothened, polished and accessories are attached if available.

*Man of the Flavor World _____
Recep Usta, came together
with Liva-Mob's
_____ experience in decoration.*

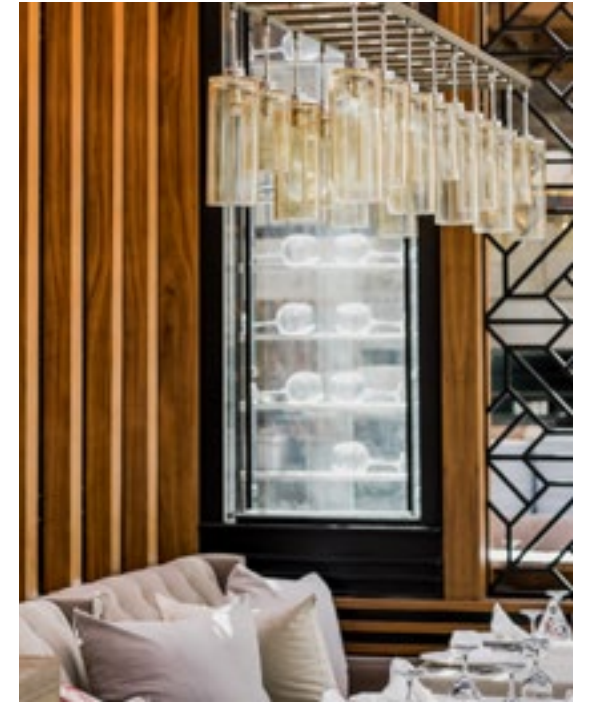

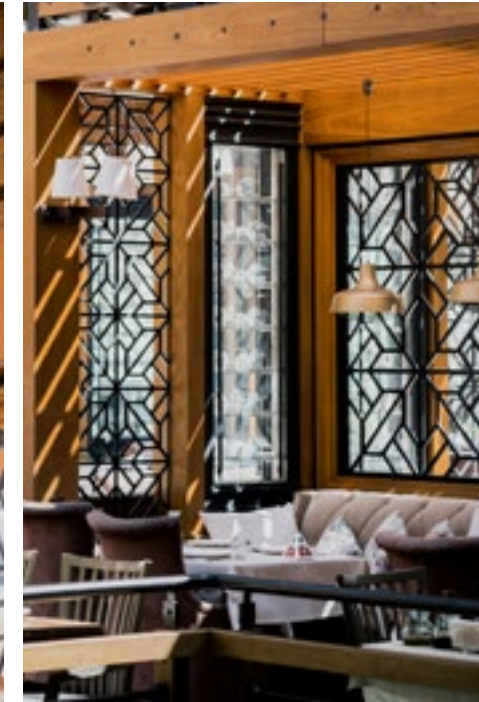

Prepared in company with interior architect Burak Özcan's design and coordination, this projects stationary and moveable furniture pieces were produced in workshops of our company.

Recep Usta

Wooden ceiling boards, bays, sitting areas and separators made out of American walnut tree linings added coziness to this place.

All of metal components that stuff movable chairs, table legs and separators were finished with matte black wrought iron.

Ahşap Özen İster

*Plastik ve metal malzemeler
uzun yıllar dayanabilir
ancak ahşap yaşayan bir
malzeme olduğu için bakımı
yapılmadığında parlaklığını
ve rengini kaybeder,
dolayısıyla yaşamını yitirir.*

Ahşabın etkileyici görünümünü
kaybetmemesi için bakımı
mutlaka yapılmalıdır.
Bu yüzden; cilalama,
parlatma, yüzey koruma ve
renk matlaştırma işlemleri ile
ahşabın ömrü uzatılır. İlk günkü
görünümünü koruyarak uzun
yıllar yaşaması sağlanır.

*Aesthetics of Liva-Mob was —————
hidden in the details
of the place...*

Designed with the experience of Architect Kamer Sağlam Yiğın and actualized in cooperation with Yazgan Design Architecture, Merkez Ankara Project Sales Office was shaped with the touch of Liva-Mob.

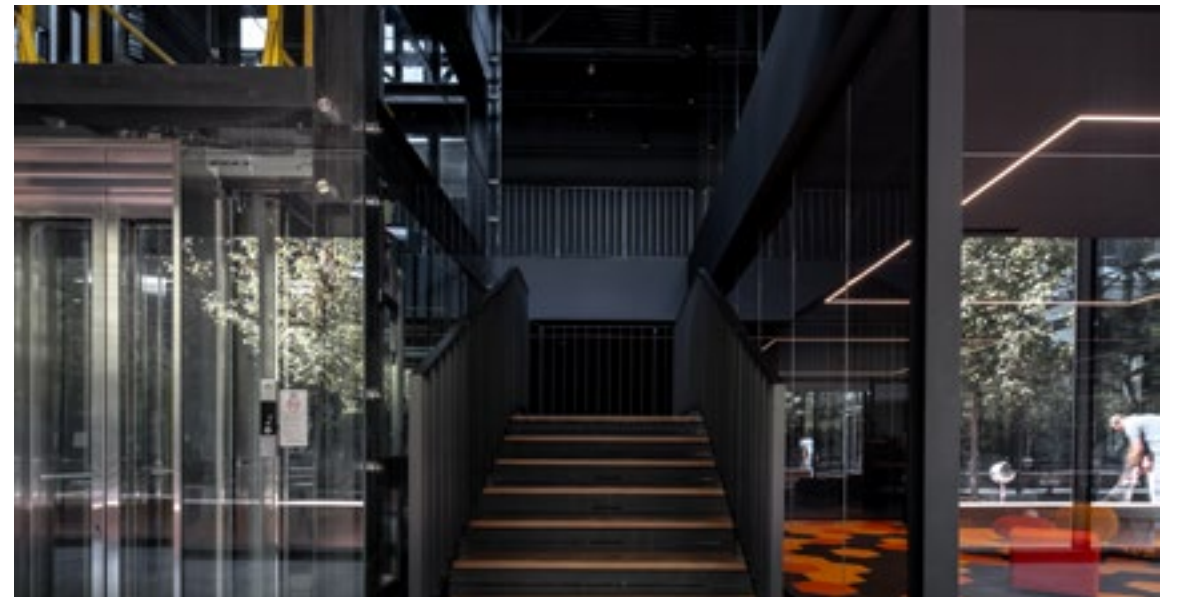

Merkez Ankara

With its wainscotings, information desk, doors, stairs, kitchen service desk and model stands included in the design, this conspicuous location exhibits its difference in its each and every single detail.

Furniture's Effects On People

Places paved with wooden materials have psychological and physical effects on people and these effects resemble those that are observed when people spend time in nature.

Physical beneficial effects include lowering blood pressure at a certain extent while psychological beneficial effects comprise bringing out feeling of coziness, comfort and serenity. Predominant usage of wooden materials inside offices boosts creativity, energy and comfort. These wooden materials also increase the quality of air by balancing ambient air humidity.

*TRYP By Wyndham,
opened doors
for elegance...*

TRYP By Wyndham Project says
 "Welcome" to its guests with Liva-Mob
 who undertook the woodworks of this
 project in its entirety.

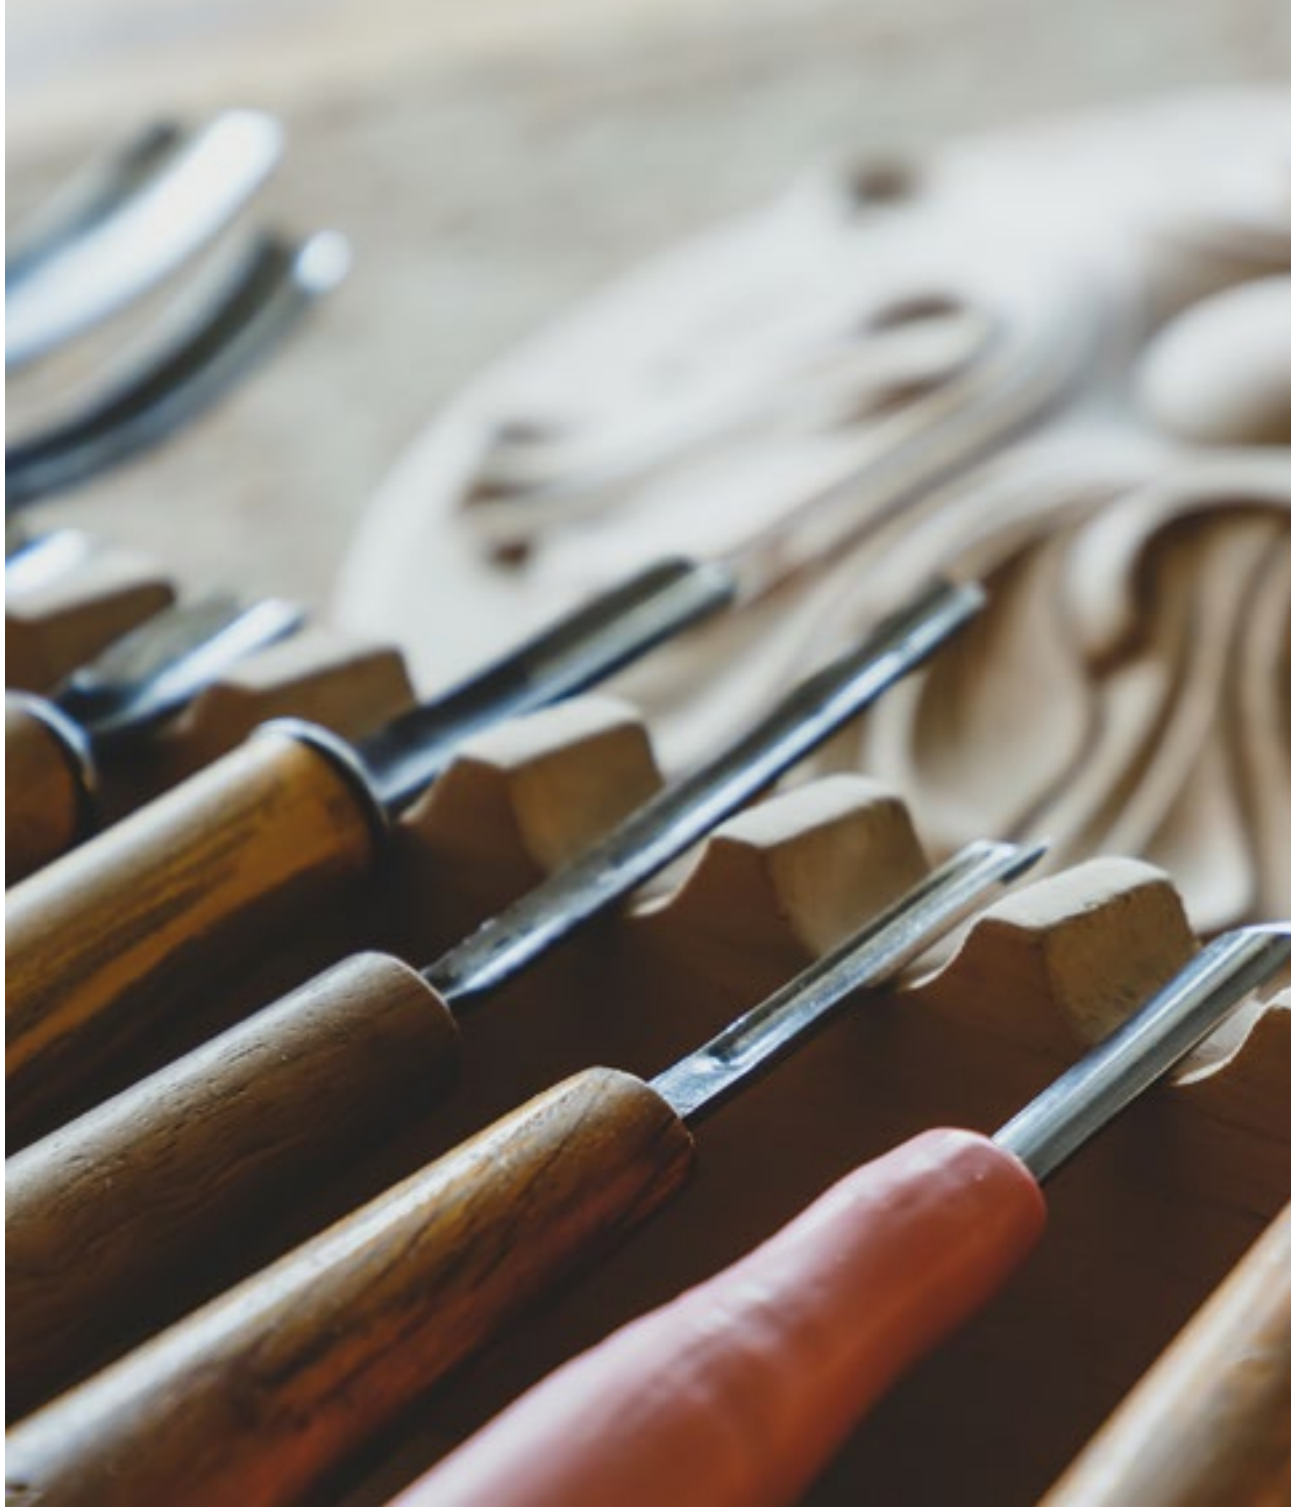

TRYP By Wyndham

TRYP By Wyndham Project, designed with the gifted hands of Architect Hayri Anamuroğlu and in cooperation with Tanart Architecture, has managed to draw attention with Liva-Mob's applications.

Eviniz için Küçük Tüyolar

***Oda dekorasyonu için
istediğiniz bir rengi ana
renginiz olarak belirleyin.
Seçtiğiniz büyük parçalar bu
renk olsun ve ana rengine
uygun birkaç rengi de küçük
aksesurlarınızda kullanın.***

Eğer açık renk koltuklar tercih ettiyseniz kırlentlerinizi canlı tonlarda seçmelisiniz. Örneğin, krem tonlarında bir koltuk takımı için pas renginde birkaç küçük kırlent dekorasyonunuza şıklık katacaktır.

Doğal ahşap döşemeler daha çok klasik tarzı yansıttığı için modern dekorasyon tercihinizde kullanmamalısınız.

*Liva-Mob
brought its quality
in Seyfi Balık Oran...*

Seyfi Balık Oran in which all wooden furniture was implemented with the experience of Liva-Mob, offers its visitors a pleasant atmosphere along with its delicacies.

Seyfi Balık

The project bearing the signature of Architect Burak Özcan and actualized in cooperation with Aral Architecture was crowned with the quality of Liva-Mob.
